Professional Summary

Full-stack developer and software engineer building web applications and backend services with React, Next.js, TypeScript, Python, FastAPI, and PostgreSQL. Currently a data engineer building Medallion Architecture pipelines and a Python backend application that has collected 300,000+ emails. Uses AI-assisted development daily (Claude Code, Claude, ChatGPT, Gemini) to speed up coding and debugging. Experience across on-site, hybrid, and remote roles, including early-shift schedules (3am–6am PH start) to overlap with US/EU teams.

Technical Skills

Languages: Python, SQL, TypeScript, JavaScript (ES6+)
Frontend: React, Next.js, Tailwind CSS, shadcn/ui
Backend: FastAPI, NestJS
Databases & ORM: PostgreSQL, Neon, SQLAlchemy, Drizzle ORM
AI-Assisted Development: Claude Code, Claude, ChatGPT, Gemini
Data Engineering (on the job since July 2026): Databricks, Dagster, DBT, Apache Iceberg, Trino, Medallion Architecture
DevOps (on the job since July 2026): Docker, Kubernetes (OKD), Tekton, ArgoCD, Azure DevOps
Tools & Environment: Git, GitHub, Vercel, Render, Linux

Professional Experience

SWAK BPO Corp. | On-site

Junior Data Engineer

July 2026 – Present

- Built a Python, FastAPI, and SQLAlchemy backend application that collects and categorizes emails, folders, and sub-folders from selected accounts and tracks daily email counts; 300,000+ emails collected to date, with new and updated emails synced every 2 hours.
- Build Medallion Architecture pipelines (mostly bronze to silver, often through gold) from platform and application data using Python, Databricks, and Dagster, so data is trusted before it reaches BI dashboards.
- Write and maintain SQL models in PostgreSQL and DBT models for analytics and reporting; work with tables on Apache Iceberg and Trino.
- Assist with pipeline deployment using Docker, OKD, Tekton, ArgoCD, and Azure DevOps.
- Use Claude Code (company-provided) in a Linux terminal for development and debugging.

Junior Full-Stack Developer

April 2026 – July 2026

- Developed backend services and internal tools using Express.js, Drizzle ORM, and PostgreSQL.
- Built full-stack features with Next.js and NestJS to support internal workflows, working with stakeholders to gather requirements.

Systems Engineer II | La Rose Noire Philippines | On-site

August 2025 – October 2025

- Developed and maintained internal systems using PHP, Tailwind CSS, and SQL to support business operations.
- Diagnosed and resolved production issues and contributed to workflow improvements to improve system reliability.

Personal medical leave (fully recovered) | November 2023 – July 2025

Junior Developer | Citrof Group, Inc. | Remote

August 2023 – November 2023

- Contributed to production applications using Next.js, TypeScript, Tailwind CSS, and PostgreSQL.
- Built reusable frontend components, supported backend integrations, and delivered functional modules in a client-driven environment.

Systems Analyst | STRIDE Consulting Inc. | Hybrid

October 2020 – July 2023

- Delivered consulting solutions for government and enterprise clients, translating business requirements into system designs and data workflows.
- Built interactive dashboards using R Shiny with mapping and analytics for public sector reporting.
- Developed web interfaces and data submission systems using HTML, CSS, JavaScript, and GraphQL.
- Automated reporting pipelines and data processing workflows using R and R Markdown.

Projects & Volunteer Work

Full-Stack Developer (Volunteer) | Hills of Glory - Mabalacat

May 2025 – Present

- Design and develop a full-stack system for administrative workflows using Next.js, NestJS, and PostgreSQL with Drizzle ORM, refining requirements with stakeholders.
- Build dashboards and role-based access control (RBAC) with Auth.js; deploy on Vercel with Neon PostgreSQL.

Personal Portfolio Website & API (Personal Project)

https://jorielbriansudario.vercel.app/

- Built a portfolio site with Next.js, React, TypeScript, Tailwind CSS, and shadcn/ui, deployed on Vercel.
- Developed a Python REST API with FastAPI, SQLAlchemy, Pydantic, and Alembic migrations on PostgreSQL (Neon), deployed on Render, with admin authentication and content management.

Web Developer (Project-Based) | Digital Blast | Remote

November 2025 – February 2026

- Developed and launched the official WordPress business website with a responsive UI aligned to brand identity, optimized for performance and on-page SEO.

Internships

Network Administration Intern | STRIDE Consulting Inc.

November 2019 – March 2020

Assisted in network configuration, deployment, and maintenance of devices supporting field data collection.

Computer Troubleshooting Intern

April 2017 – May 2017

Developed .NET application components and supported deployment and data encoding for field data collection systems.

IT Office Intern

April 2016 – May 2016

Developed and tested embedded system components on Arduino and STM microcontrollers; prepared technical documentation.

Education

Polytechnic University of the Philippines

Diploma in Computer Engineering Technology | June 2015 – April 2023
