PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building web applications, internal tools, and backend services using React, Next.js, TypeScript, and Node.js-based frameworks, alongside SQL and PostgreSQL work across multiple roles. Currently working as a data engineer, building data pipelines and backend applications with Python, FastAPI, Databricks, and Dagster within a Medallion Architecture. Experience spans on-site, hybrid, and remote roles, including early-shift schedules (3am–6am PH start) to overlap with US/EU teams.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript (ES6+)

Frontend Development: Next.js, React, Tailwind CSS, shadcn/ui

Backend & APIs: FastAPI

Databases & ORM: PostgreSQL, Neon, Drizzle ORM, SQLAlchemy

Data Pipeline Tools: Databricks, Dagster, Medallion Architecture

Tools & Environment: Git, GitHub, Vercel, Linux, Claude Code, Docker, Azure DevOps

PROFESSIONAL EXPERIENCE

SWAK BPO Corp. | On-site

Junior Data Engineer

July 2026 – Present

- Write and maintain SQL models and transformations in PostgreSQL to support analytics and reporting.
- Support data pipeline development using Python, Databricks, and Dagster within a Medallion Architecture (bronze/silver/gold), working with tables on Apache Iceberg and Trino.
- Build and maintain DBT models for structured data transformations across data layers.
- Assist with pipeline deployment using Docker, OKD, Tekton, ArgoCD, and Azure DevOps as part of the team's DataOps workflow.
- Built a backend application using Python, FastAPI, and SQLAlchemy to collect and categorize emails, folders, and sub-folders from selected accounts, tracking daily email volumes and related metadata.

Junior Full-Stack Developer

April 2026 – July 2026

- Developed backend services and internal tools using Express.js, Drizzle ORM, and PostgreSQL.
- Built full-stack features with Next.js and NestJS to support internal workflows.
- Collaborated with stakeholders to gather requirements and deliver internal tools.

Systems Engineer II | La Rose Noire Philippines | On-site

August 2025 – October 2025

- Developed and maintained internal systems using PHP, Tailwind CSS, and SQL to support business operations.
- Diagnosed and resolved production issues to improve system reliability.
- Contributed to operational workflow improvements through system changes.

Personal medical leave (fully recovered) | November 2023 – July 2025

Junior Developer | Citrof Group, Inc. | Remote
August 2023 – November 2023

- Contributed to production applications using Next.js, TypeScript, Tailwind CSS, and PostgreSQL.
- Built reusable frontend components and supported backend integrations.
- Delivered functional modules in a client-driven development environment.

Systems Analyst | STRIDE Consulting Inc. | Hybrid
October 2020 – July 2023

- Delivered consulting solutions for government and enterprise clients, focusing on system design and data workflows.
- Built interactive dashboards using R Shiny with mapping and analytics for public sector reporting.
- Developed web interfaces and data submission systems using HTML, CSS, JavaScript, and GraphQL.
- Automated reporting pipelines and data processing workflows using R and R Markdown.
- Translated business requirements into technical implementations and data-driven solutions.

PROJECTS & VOLUNTEER WORK

Full-Stack Developer (Volunteer) | Hills of Glory - Mabalacat
May 2025 – Present

- Design and develop a full-stack system for administrative workflows using Next.js, NestJS, and PostgreSQL with Drizzle ORM.
- Build dashboards and role-based access control (RBAC) with Auth.js.
- Deploy and manage the application on Vercel with Neon PostgreSQL.
- Collaborate with stakeholders to refine requirements.

Personal Portfolio Website & API (Personal Project) | jorielbriansudario.vercel.app
- Built a portfolio site with Next.js, React, TypeScript, Tailwind CSS, and shadcn/ui, deployed on Vercel.
- Developed a Python REST API backend with FastAPI, SQLAlchemy, Pydantic, and Alembic migrations on PostgreSQL (Neon), deployed on Render.
- Implemented admin authentication and content management for projects, skills, and qualifications data.

Web Developer (Project-Based) | Digital Blast | Remote
November 2025 – February 2026

- Developed and launched the official WordPress business website.
- Implemented responsive UI aligned with brand identity.
- Optimized performance and applied on-page SEO strategies.

INTERNSHIPS

Network Administration Intern | STRIDE Consulting Inc.
November 2019 – March 2020

- Assisted in network configuration, deployment, and maintenance of devices for field operations.
- Supported system connectivity and reliability for distributed data collection environments.
- Collaborated with technical teams to ensure stable infrastructure for operational systems.

Computer Troubleshooting Intern
April 2017 – May 2017

- Developed and modified application components using .NET technologies.
- Supported deployment of device-based systems used in field data collection projects.
- Managed technical data encoding and ensured accuracy of collected datasets.

IT Office Intern

April 2016 – May 2016

- Developed and tested embedded system components using microcontrollers (e.g., Arduino, STM-based platforms).
- Assisted in hardware-software integration for device-driven data collection and processing workflows.
- Assembled and validated electronic components to support system functionality and reliability.
- Prepared technical documentation, reports, and system presentations for internal use.

EDUCATION

Polytechnic University of the Philippines

Diploma in Computer Engineering Technology | June 2015 – April 2023
